## Web hosting

### Server Specifications

#### YOUR CHOICE OF EITHER A WINDOWS OR LINUX SERVER:

You can choose whether your web space is set up on a Windows or Linux Server. Your developer will advise you on which is appropriate for your website.

#### UNLIMITED MB OF RELIABLE UK WEBSITE HOUSED ON BRAND NEW SERVERS!

You receive reliable webspace based in multi-million pound servers located in the UK.

#### UN-RESTRICTED VISITOR BANDWIDTH:

Bandwidth (data transfer) is a measure of the amount of data transferred by your Website. For example if your Website is a total of 1mb and 1000 people view it in one month the bandwidth used for that month would be 1000mb (1Gb). If we cannot host your Website due to high bandwidth we will refund the entire hosting fee.

#### ACCOUNT CONTROL PANEL:

You will get access to our exclusive account control centre. Here you can purchase new hosting accounts, purchase Hosting Extras, Add sub domains, update your account information and lots lots more...

#### DOMAIN CONTROL PANEL:

Your package will come with your own personal control system software which gives you ultimate control over your account. You can set up e-mail accounts, auto responders, Forwarders and much much more.

#### NO ADVERTS OR BANNERS:

We do not advertise on your web space at all.

#### 99.9% UPTIME:

We guarantee 99.9% uptime on all hosting packages.

#### 24/7 FTP ACCESS:

FTP allows you to upload files and make changes to your pages. We use the latest FTP servers to make uploading to your webspace quick and simple. We give you FTP access to your account 24 hours per day 7 days a week via any (ISP) connection you like.

#### ONLINE FTP INTERFACE:

Within your Account Control Panel you are able to upload, download and remove files via FTP using our excellent Online FTP Interface.

#### FTP ACCESS VIA ANY ISP:

Some hosts restrict access to FTP we DO NOT. You can use our services in conjunction with any ISP.

#### 20 SUB DOMAINS PER TRUE DOMAIN:

You can have up to 20 Sub Domains per True Domain. A sub domain is [www.something.yourdomain.co.uk](http://www.something.yourdomain.co.uk).

#### MULTIPLE DOMAIN ALIASES/FORWARDERS

You can have multiple Domain Aliases/Forwarders. You can either register or transfer domains on to your account that we set up to forward to another domain for you. These can easily be ordered via your account control panel after ordering your main account.

#### MIRRORED BACK UP:

We mirror your website on a separate disk in order to protect against disk failure. (SSI)

#### SERVER SIDE INCLUDES:

Server Side Includes enable the addition of dynamic elements to your HTML web pages. Automatically insert dates and file information as well as calling external programs such as hit counters.

#### CUSTOM ERROR PAGES:

Customer Error Pages are fully supported.

#### ONLINE UPGRADE FACILITY:

Our online upgrade system allows you to add upgrade and extras to your account in just a couple seconds online.

#### FREE TRANSFER AWAY:

If you decide, for whatever reason, to move your domain name away we will not charge you an administration fee to do so unlike some of our competitors.

#### UNLIMITED POP3 E-MAIL ACCOUNTS:

A POP3 mail box stores e-mails on the web securely until you are ready to read them. Collect e-mails securely via your e-mail program (i.e. Outlook Express) using the POP3 e-mail box provided.

#### UNLIMITED E-MAIL FORWARDERS:

An e-mail forwarder forwards all the e-mail sent to your POP3 account to your existing e-mail address (this would mean you do not have to own an e-mail program such as Outlook express).

# TravisBead

## UNLIMITED E-MAIL AUTO RESPONDERS:

This allows you to have a pre-configured e-mail message that is sent automatically from one of your POP3 accounts when an e-mail is received.

## SMS E-MAIL ALERTS:

You can setup any of your mailboxes or forwarders to alert you via an SMS message when new mail is waiting.

## WEBMAIL:

View/send and receive e-mail online. If you run your website on the move and require a 'hotmail' type e-mail interface then this is perfect for you!

## CATCH ALL E-MAIL:

This allows you to collect any e-mail to your Domain into one e-mail account (eg. anything@yourdomain.co.uk).

## CGI BIN INSTALLED:

Your account is equipped with its own CGI-BIN, allowing you to install and use your own CGI scripts. There are also thousands of free scripts available on the Internet for you to install and use!

## CGI AND PERL SUPPORT:

CGI and Perl are fully supported

## Windows Features

### MY SQL DATABASE(S):

On this package you get 10 My SQL Databases. MySQL is a powerful database engine designed to provide fast access to stored data. MySQL is very fast, reliable, and easy to use. It enables easy database creation and administration. You can add additional databases to your account at any time. MYSQL is the open-source standard for databases and is ideal for web applications based on our Linux Servers.

### PHP4 SCRIPTING SUPPORT:

PHP4 is a server-side HTML embedded scripting language. PHP is ideal for the creation of dynamic data driven web sites. PHP4 is fully enabled on all of our packages.
